LinkedIn | LeetCode | Email | +91 6300593324

1 Professional Summary

Aspiring Software Development Engineer with strong foundations in Full-Stack Web Development and Python programming. Currently pursuing a Bachelor of Technology in Computer Science and Engineering while undergoing intensive software development training through NxtWave's CCBP 4.0 Academy. Passionate about building scalable applications, solving complex engineering problems, and writing efficient, maintainable code.

2 Projects

BALAJI MUSIC *JavaScript, Node.js, Express.js, SQLite, REST APIs*

- Engineered a scalable music streaming application supporting 1,000+ simulated concurrent user streams through optimized API endpoints and reusable backend services.
- Improved audio retrieval and search performance by 40% through database indexing, efficient SQL query design, and backend response optimization.
- Developed secure user authentication, playlist management, and premium-track purchase workflows while maintaining clean and scalable architecture.
- Live Project: balaji2006.ccbp.tech

Academic Performance & Class Management Dashboard *HTML, CSS, JavaScript, Bootstrap, REST APIs*

- Engineered an academic management portal for tracking student performance, attendance, and classroom activities.
- Improved filtering, sorting, and search performance by 40% using optimized JavaScript algorithms and efficient DOM manipulation techniques.
- Developed responsive dashboards for attendance monitoring, grade management, and student profiling using Bootstrap and custom CSS.
- Live Project: sec9.ccbp.tech

3 Education

2024 – **Bachelor of Technology (B.Tech), Computer Science and Engineering**
2028

Vignan's Foundation for Science, Technology & Research (Vignan University),
Guntur

4 Professional Training

NxtWave CCBP 4.0 Academy Present

- Receiving intensive industry-focused training in Full-Stack Development, Python Programming, Data Structures & Algorithms, and Software Engineering.
- Building real-world applications while strengthening problem-solving, debugging, and coding interview skills.
- Practicing scalable application development, clean coding principles, API integration, and software engineering best practices.

5 Skills

Programming Languages: Python, SQL

Frontend Development: HTML5, CSS3, JavaScript, Bootstrap

Backend & Databases: SQLite, REST APIs

Computer Science: Problem Solving, Data Structures, Algorithms

Developer Tools: VS Code, Postman, Git, GitHub, API Integration

6 Achievements & Coding Profiles

- Active problem solver focused on Data Structures, Algorithms, and coding interview preparation.
- LeetCode: [ch_siva_2006](#)
- LinkedIn: [CHEEDELLA SIVA VENKATA NAGA SAI KIRAN](#)
- Continuously developing full-stack projects and enhancing software engineering skills through hands-on learning and implementation.
